

## IMPORTANT PATIENT INFORMATION FOR CARDIOLOGY PRACTICES

In a 25 inch space and no capital investment, cardiologists can significantly increase patient data and support practice revenues

**CDL Cardiac First Pass Imaging:**  
Better data / Faster throughput.

### Here are 6 startling results of the CDL First Pass:

Enhance the quality of services with new diagnostic imaging that permits you to better evaluate your patient's condition.

Imaging protocol performed in minutes, within your current operation, without significant increase to your total patient exam time.

It's the perfect add-on service, folded into your existing SPECT protocol and treadmill stress procedures.

Imaging provides assessment of ventricular function at rest and "true" peak exercise, allowing for greater sensitivity for the diagnosis and prognosis of coronary artery disease.

Provides true exercise function of the Left Ventricles, both Qualitatively and Quantitatively, independent of cardiac rhythm abnormalities. Quick 30 second acquisition time and automatic bolus detection for immediate physician review.

Higher efficiency for patient treatment with increased practice revenues.

25  
inch space

An amazingly small footprint of only 21" x 60" with floor plate—fits in almost any treadmill room.

Providing a clearer view

### Available exclusively from:

**ECLIPSE**  
SYSTEMS, INC.

## IMPORTANT CARDIOLOGY ANNOUNCEMENT \_\_\_\_\_

Eclipse Systems continues a focus on servicing and refurbishing Nuclear Imaging systems in order to open many new diagnostic opportunities to cardiologists by:

-Delivering outstanding service. Our expertise results in throughput productivity, better quality images and competitive efficiencies for the practice. With our systems, expert field service and *National Parts Locator System*, your downtime is virtually gone.

-Providing refurbished cardiac imaging systems that can otherwise be cost-prohibitive. This gives you immediate access to rich imaging data. Eclipse offers a 100 percent record of ICANL and ACR Accreditation.

Offering *faster service with true customer care*—far superior to the original manufacturer whose support is typically mediocre.

You will be confident in sending high quality images with your reports to referring physicians. Your images will look good and so will you.

**Eclipse Medical Systems exclusively represents CDL Medical Tech, Inc.**

### **The CDL CAM—First Pass RNA Imaging.**

A dedicated First Pass Radionuclide Angiography imaging system that is fully compatible with your existing SPECT protocol. *It's the leading edge solution.*

In a mere 21 x 60 inch footprint it fits in almost any treadmill room.

A breakthrough technology you will want to see in demonstration. There's nothing like it.

Gain patient data faster and with more efficiency.

Build your practice with revenue benefits.

### **For a limited time No Capital Investment is required.**

Systems are already in use so don't delay.

You'll receive a report prepared by Dr. Thomas P. Power when we meet.

His report: *CLINICAL BENEFITS OF FIRST PASS IMAGING: A Physician's Perspective* will provide important information you can use.

We will contact your office to arrange an appointment, or have your office contact us:
